

Sendai Framework Voluntary Commitment

“CONTRIBUTING VIA CORE BUSINESS STRENGTHS, DRR INNOVATION AND PARTNERSHIPS”

Progress Report, Deliverable #2

December 2021

Commitment:

Kokusai Kogyo commits to innovating and delivering geospatial information technology solutions that contribute to building resilience to disasters and accelerating Sustainable Development. We commit to make accessible these solutions not only in Japan, but across Asia and beyond.

Deliverable:

2. DELIVERING DRR/SDGs/CLIMATE SOLUTIONS FOR LOCAL LEVEL ACTION

We commit to work with, and through, our partners described in Deliverable #1 to identify, if necessary innovate and develop, and provide solutions for local authority and local community clients in VIP (Vietnam, Indonesia, Philippines) countries, plus Taiwan, Singapore, and Japan. We will design, whenever possible, solutions that encourage coherence between, and coherent action to tackle DRR, SDGs, and Climate Change, and build disaster resilience in communities as a foundation of Sustainable Development. Outputs would be presented as periodically updated reports including list of business case studies and summaries describing milestone projects..

Outputs:

2020/08

Provided InSAR (Interferometric Synthetic Aperture Radar) survey and analysis to a major public facility in Singapore via our partner company, PrimusTech. Our InSAR solution provided the client with risk information, i.e. the scale and trend of land deformation within their premises. The information will be used to assist ongoing facilities management and the planning of future interventions to reduce risk. (No press release available)
